PROJECT COMPONENTS

Union City Intermodal Station

Prepared for the City of Union City by ROMA Design Group in association with AREP, Earth-Tech, PBQ&D, Febr & Peers and Mark Thomas & Company

JULY 14, 2005

Project Summary:

The original project was to provide a pedestrian grade separation across the UPRR tracks for safe access near the existing BART Station in Union City. The alternative project is to modify the existing Union City BART Station to allow integration of a future rail station (serving Capitol Corridor and future Dumbarton Rail), reconfigure the existing BART site to improve pedestrian, bike, vehicle and transit access to and through the station area, and reconfigure the existing BART parking lot to better adapt the existing 14-acre site for future Transit Oriented Development.

The pedestrian grade separation will be built (below tracks) in conjunction with the future Dumbarton Rail Project.

Prior TCRP Action:

- Original application was approved on July 11, 2001 (Resolution TA-01-11).
- An Amendment was approved June 26, 2003, Resolution TAA-03-02, to update the project schedule. Phase 1 – ENV was delayed due to lengthy discussions with the various rail operators (BART, CCJPA, UP) on the design of the grade separation. The delay in completing Phase 1 - ENV, in turn, delayed the start of the remaining phases.
- An AB 1335 Letter of No Prejudice in the amount of \$200,000 for Phase 2 was approved on September 24, 2003 (TL-03-01).
- **An alternative project was approved March 16, 2006, and the LONP was abandoned (TAA-06-13).**

Status of Conditions: No conditions.

Discussion/Issues: No issues.
